- Centriod
- Anilam
- Acu-Rite

**Manual & CNC Machines**

- Summit
- ATrump
- Kent
- Dalian

## Onsite Service for All Makes and Types of Machine Tools

**Emergency Repair:** We can help minimize your downtime by providing fast, efficient repair work, even outside normal hours, if required. Our expertise includes CNC and conventional machines. Electrical, mechanical, hydraulic and control components can all be serviced by our trained technicians.

**Machine installation:** We can install, test and commission your new equipment to insure a smooth start.

**Troubleshooting:** Having a problem with a machine? Let us check it out to diagnose and fix the problem.

**Purchasing a Used Machine:** Let Total Machine Service give you a complete and documented machine evaluation. We will check the machine for accuracy, repeatability, spindle and way wear.

**Machine Moving:** We can tear down, move and set up your machine, or check the alignment after you move it.

## Contract Maintenance Programs

**Preventive Maintenance Programs:** Let us set up a custom PM plan for your facility.

**Training:** We can train your maintenance personnel on proper leveling and alignment procedures and regular, required upkeep.

**Contract Maintenance:** Take advantage of our special rates when you contract in advance for routine PM maintenance and long-term projects. Contact us for our Contract Maintenance Rate Sheet.

## Machine Tool Upgrading, Rebuilding and Retrofitting

**Alignment:** We offer complete scraping and alignment services, including installation of wear plates, Rulon, Turcite and cast iron.

**Retrofits and Control Upgrades:** Upgrade your machine to the latest CNC or PLC controls. Complete rebuilds and retrofits of your machines can be done in your plant.

**Machine Evaluation:** We can help you determine whether to rebuild or replace a machine by providing accurate and fair estimates. Total Machine Service will provide a detailed analysis of your machine's condition and the cost to rebuild or upgrade it.

**Laser Calibration:** We can laser calibrate your CNC machine or scales on your manual machine and provide documentation for your records.
